Peripheral Devices Assignment

1. Types of Printers, Scanners and Webcams

Device Type	Example / Type	Real-Life Use Case
Printer	Inkjet Printer	Printing college assignments and color notes
Printer	Laser Printer	Printing office documents quickly
Printer	Thermal Printer	Printing bills and receipts at shops
Scanner	Flatbed Scanner	Scanning certificates and documents
Scanner	Sheet-fed Scanner	Scanning multiple pages of office documents
Webcam	Built-in Webcam	Attending online college classes on a laptop
Webcam	USB External Webcam	Video meetings and online presentations

2. Typical Home Printer Connection Diagram

Laptop / PC		**Home Printer**
USB Port	→ USB Cable →	USB Port
	OR	
Wi-Fi	→ Wireless Network →	Wi-Fi

A typical home printer can be connected directly to a laptop/PC using a USB cable, or wirelessly through Wi-Fi. After connecting, the printer driver or operating-system setup may be required.

3. Connection Interfaces for Peripherals

Interface	Advantage	Disadvantage
USB	Fast and reliable; works with most computers.	Requires a physical cable and an available USB port.
Wi-Fi	Wireless and convenient; multiple devices can share the printer.	Depends on the Wi-Fi network and may have connect
Bluetooth	Wireless and useful for short-range connections	Shorter range and generally slower than a wired USB

4. Step-by-Step: Connecting a Printer to a Computer

1. Place the printer near the computer and connect the printer to a power source.

2. Turn on the printer and wait until it is ready.

3. For a wired connection, connect the printer to the computer using a USB printer cable.

4. If using Wi-Fi instead, connect the printer to the same Wi-Fi network as the computer using the printer's control panel.

5. On the computer, open the printer settings and select the connected printer.

6. Install the printer driver or allow Windows/macOS to install the required driver automatically.

7. Set the printer as the default printer if required.

8. Print a test page to confirm that the connection and setup are working correctly.

Conclusion: Printers, scanners and webcams can use wired or wireless interfaces such as USB, Wi-Fi and Bluetooth. The appropriate connection depends on speed, convenience, range and compatibility requirements.
